EDUCATION

Chitkara University - Rajpura, India

Bachelor of Technology in Computer Science

CGPA 8.75

Aug 2022 – May 2026

PROJECTS

Documentor AI | *FastAPI, LangChain, Ollama, ChromaDB* | [GitHub](#)

Jul 2026

- Built a RAG-based document Q&A system using LangChain and FastAPI, enabling semantic search across PDF, DOCX, and TXT documents.
- Integrated Ollama local LLM to enable privacy-focused AI inference without external API dependency.
- Developed a document processing pipeline supporting 3+ file formats, enabling efficient text extraction and indexing
- Implemented AI-powered diagram generation producing flowcharts, mind maps, and sequence diagrams automatically from natural language prompts.
- Designed JWT-secured authentication and REST APIs supporting secure multi-user document querying.

Averra | *MERN Stack* | [Live](#) | [GitHub](#)

Mar 2025

- Developed and deployed a full-stack Society Management Web App with 90+ active users across multiple roles — residents, guards, admins, and service providers — using Node.js, Express, MongoDB, React, and JWT for secure role-based access
- Implemented 8+ modules including service booking, complaint tracking, visitor passes, SOS alerts, notices, events, and polls, reducing manual management effort by ~60%.
- Built scalable dashboards enabling 120+ user interactions for task tracking, visitor management, and real-time role-based workflows.

Job Hunt Platform | *MERN Stack* | [GitHub](#)

Apr 2024

- Architected and developed a MERN stack job portal with admin dashboard, job postings, profile management, and JWT-secured authentication.
- Integrated Cloudinary and Multer for secure file uploads, improving upload reliability by 40%
- Managed 30+ development tasks using Jira, increasing sprint efficiency by 25%
- Enhanced user experience through real-time updates, responsive design, and optimized data handling.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL, HTML/CSS

Frontend: React, Vite, Tailwind CSS, Bootstrap

Backend & APIs: Node.js, Express.js, FastAPI, REST APIs, SQLAlchemy

AI/LLM: LangChain, Ollama LLM, Retrieval – Augmented Generation (RAG)

Database & Tools: MongoDB, MySQL, VS Code, Git, Github, Postman

Others: Data Structures and Algorithms

ACHIEVEMENTS

- Selected among the top 8% of 1,500 students for the URA specialized technical batch based on coding and communication performance.
- Led a MERN stack project that ranked among the top 10% of 3rd-year projects (Top 40 of 400), showcasing leadership, full-stack development, and teamwork.
- Solved 900+ coding problems across platforms and achieved a LeetCode rating of 1500+ (Top 30%), demonstrating strong algorithmic proficiency.
