EDUCATION

Bachelor of Technology in Computer Science Engineering

Chitkara University – Rajpura, India

Aug 2022 – May 2026

CGPA: 8.75/10

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL, HTML5, CSS3, GoLang, SQLite

Frontend: React, Vite, Tailwind CSS, Bootstrap

Backend & APIs: Node.js, Express.js, FastAPI, REST APIs, SQLAlchemy

AI/LLM: LangChain, Ollama LLM, Retrieval-Augmented Generation (RAG)

Database & Tools: MongoDB, MySQL, Git, GitHub, VS Code, Postman

Core CS: Data Structures, Algorithms, OOPs, DBMS, Operating Systems, Computer Networks

PROJECTS

Documentor AI | FastAPI, LangChain, Ollama, ChromaDB | [GitHub](#)

Mar 2026

Built a RAG-based document Q&A platform supporting semantic search across multiple document formats using LangChain and FastAPI.

- Integrated Ollama-based local LLM inference for privacy-focused AI document querying without external API dependency.
- Architected a document pipeline for PDF, DOCX, and TXT files, enabling efficient text extraction for 100+ documents.
- Created more than 70 AI-powered flowcharts, mind maps, and sequence diagrams from natural language prompts.
- Secured backend services using JWT authentication and REST APIs for multi-user document access.

NextStep | MERN Stack | [GitHub](#) | [Live](#)

Dec 2025

Architected and developed a MERN stack wedding planning platform with role-based dashboards and custom recommendation engines.

- Engineered a JWT-secured role-based access control (RBAC) system with dashboards for 4 user roles.
- Optimized a budget-based recommendation engine using MongoDB aggregation pipelines to match clients with event packages.
- Implemented event tracking, guest management, and secure media uploads using Multer middleware.

Averra | MERN Stack | [GitHub](#) | [Live](#)

Mar 2025

Developed and deployed a full-stack Society Management Web App with 90+ active users across multiple roles.

- Built using Node.js, Express, MongoDB, React, and JWT for secure role-based authentication.
- Implemented 8+ modules including complaint tracking, visitor passes, SOS alerts, notices, events, and polls, reducing manual effort by 60%.
- Built scalable dashboards enabling 120+ user interactions for visitor management and real-time workflows.

ACHIEVEMENTS

- Qualified GATE CS 2026 in Computer Science.
- Selected among the top 8% of 1,500 students for the URA specialized technical batch.
- Led a MERN stack project ranked among the top 10% of 3rd-year projects (Top 40 of 400).
- Solved 900+ coding problems across platforms and achieved a LeetCode rating of 1500+.
